

## Kalihi YMCA

Date: July 2004 — July 2005

Location: Honolulu, Oahu, Hawaii

Cost: \$5,200,000

Client: YMCA of Honolulu

### Project Description

The project is a multi-story concrete building erected over a parking lot on the ground level. The new building has 26,000 square feet of space contains a reception area, activity rooms and classrooms, exercise room, lounge area, administrative offices, storage areas, kitchen, restrooms, showers, and utility rooms.

A major challenge for this project was its physical location. Being situated along a busy off-ramp, no equipment could be placed in front of the building. Furthermore, a tight entrance way leading into the project site required the structure to be erected in two phases – first the 4-story northwest wing, and later, the 2 and 3 story southwest wings using smaller equipment.
