

University of Hawaii School of Architecture

Date: March 1993 — September 1994

Location: Honolulu, Oahu, Hawaii

Cost: \$11,500,000

Client: State of Hawaii

Project Description

This project called for the construction of a three-story administrative office and classroom building with a theater style lecture hall and elevator for the School of Architecture at the University of Hawaii at Manoa. Special fiber reinforced concrete trims were installed to provide the exterior look to match adjoining buildings. Sitework included utilities, ground level parking areas, landscaping, and a pre-fabricated guardhouse. The project was completed on time and under budget. No safety or environmental violations were noted.
